Seizures Algorithm

This clinical pathway is intended to supplement, rather than substitute for, professional judgment and may be changed depending upon a patient's individual needs. Failure to comply with this pathway does not represent a breach of the standard of care.

• Start infusion of midazolam

pregnant) and review with

0.1mg/kg/hour IV

ALL the results.

• Obtain CT Head (if not

• Admit ICU. Consult a

Physician/OBGYN

Consult a **Physician** on ALL other patients. Consult an **OBGYN** for all pregnant or post-partum patients

therapeutic prior to discharge and adequate follow-up arranged.

• Known epileptic who has completely recovered from their seizure

investigations. Patient should be loaded with anticonvulsants if non-

and for whom a clear-cut cause has been identified (e.g. non-

compliance, sub-therapeutic drug levels) and with normal

necessary unless seizure recurs
